

IoT in Production

Smart technologies
driving
tomorrow's
production.

EMO
Hannover
16-21·9·2019

2,200
exhibitors

Over 2,200 companies will be exhibiting at EMO Hannover, 1,417 from abroad and 809 from Germany.*

Meet the decision-makers in production technology at EMO Hannover 2019.

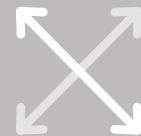

Whether disruption or revolution, Industry 4.0 is a tool for implementing all the facets of digitisation in production. And this affects the entire value chain: over product development, production, quality management, logistics, and supply infrastructure.

A world-leading exhibition, EMO Hannover maps this industrial value chain like no other event. This is the place where end-to-end plans are forged for future investments – real production resources and their digital twins at the one site.

Reach all of the key areas in production technology at the one site.

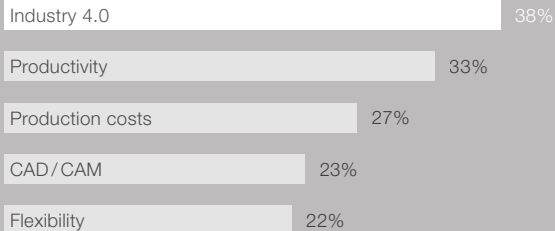

- Machine tools and flexible manufacturing systems
- Additive manufacturing
- Control and drive technologies
- Production software
- Precision tools and fixtures
- Instrumentation and quality management
- Industrial robots and handling technologies
- Material flow and storage technologies

182,000
square metres

The exhibitors have booked 182,000 net square metres of floor space.*

Industry 4.0

Top 5 subjects for EMO Hannover trade visitors:
At 38%, "Industry 4.0" takes top place.*

Be part of it!

Present your digital solutions expertise at the world-leading exhibition for metalworking.

The exhibition area **"IoT in Production"** at EMO Hannover 2019 presents a full overview of the central aspects of digitisation, e.g. Industrial Security, Data Analytics, Industrial Cloud Services, Process Monitoring, Predictive Maintenance, AI, Machine Learning, and Big Data Management. Yet these subjects can also be found in other exhibition areas, e.g. **Production Control, Virtual Product Development, Quality Management, Software, and Automation Technologies**. In addition to the many individual exhibitors, this area is also supplemented with the following activities:

- Special stand **"Industry 4.0 Area"** – visitor magnet with specialised forum for direct dialogue.
- **WGP** and **Fraunhofer-Gesellschaft** support science presentations and exhibitions.
- International views are strengthened by initiatives from **Spain, France, Switzerland, Japan, China,** and the **USA**.
- **umati – universal machine tool interface** – the new OPC UA production interface standard goes live.

130,000 trade visitors

As an exhibitor at EMO Hannover, you can address 130,000 trade visitors. Of these, over 62,000 (48%) are from abroad – so you can reach all of your target customer groups in production worldwide.*
